

EcoTrowel mixes easily and spreads like peanut butter “new finish.”

EcoTrowel is a high-performance epoxy filler and profiling product formulated for surface repair and preparation. It is easy to mix and spread with its peanut-butter like consistency.

(Don't worry. It's not actually peanut butter!) **EcoTrowel** is lightweight and suitable for an infinite variety of composite, architectural, industrial, and art-related applications. It can be applied to wood, concrete, and even canvas at a half-inch thickness without sagging or slumping. You can easily sand, shape, drill, tap, machine, or router to your liking. All the while, **EcoTrowel** remains durable for life.

EcoTrowel is a high performance epoxy filler and profiling product formulated for surface finishing of composite structures and more.

KEY FEATURES
